ESTD FLOWERS 1990

PLAN YOUR CUTTING GARDEN

Cut Flower Garden Planner

the season of -----

GROWN IN MOULTONBOROUGH, NEW HAMPSHIRE · KNOLLWOODFLOWERS.COM

How to use this planner

A cutting garden is mostly timing: starting seeds on the right week, sowing again before the first flush fades, and knowing which bed is free in July. These pages hold all of it.

- **Seed-start calculator:** count back from your last frost to get every start date.
- **Crop plan:** each flower, how many plants, and when it goes out.
- **Succession tracker:** re-sow fast growers every 2–3 weeks for flowers all season.
- **Bed plans:** map what grows where.
- **Harvest log:** stems cut and where they went.
- **Seed inventory:** what you have, and what to save.

Print as many copies as you like.

Lots of love

MEGAN, KNOLLWOOD FLOWERS

Seed-start calculator

MY LAST SPRING FROST _____

Count back the weeks shown from your frost date and write the start date. Common cut flowers are filled in for you.

FLOWER	START INDOORS	MY START DATE	PLANT OUT
Snapdragon	8–10 weeks before		
Strawflower	6–8 weeks before		
Celosia	6–8 weeks before		
Dahlia (seed)	6–8 weeks before		
Amaranthus	4–6 weeks before		
Zinnia	4 weeks before		
Cosmos	4–6 weeks before
